

the australian institute of landscape architects present

2011 queensland state awards exhibition

Landscape Architecture is the key Australian environment and design profession. It involves the investigation of and designed response to our landscapes. The profession represents a synthesis of arts, science and technical philosophies and practices that seek to care for our landscapes in a holistic, creative and sustainable manner.

Landscape Architects research, plan, design and advise on the stewardship, conservation and sustainability of development of the environment and spaces, both within and beyond the built environment.

The **2011 AILA QLD AWARDS EXHIBITION** showcases the works of Queensland's finest Landscape Architects and gives the public the opportunity to view the high quality projects and designs submitted for the awards, a rare insight into the inner workings of contemporary Australian landscape architecture and the many forms in which it takes and develops.

This free public exhibition uncovers the detailed and creative profession of Landscape Architecture.
