

PLAY IN A CHANGING WORLD

Presenting the Australian series of the Day-Of-Play Seminars 2010.

The International Play industry recognizes the need to understand and respond to the changing needs of our communities, children and youth.

Responding to the challenges of health, wellbeing and the requirements of different age groups:

- Learn how to develop playground equipment to suit the social and cognitive requirements of children in the community where it's based
- Understand the play needs of different age groups — why and how they play will assist you in the planning and designing future playground projects
- Remove the guess-work from your designs — use evidence-based research

Responding to the challenges of managing the life-cycle of play equipment:

- Learn about the life-time cost of a playground
- Learn about the planning, management, architectural and design strategies for minimizing vandalism and graffiti on playgrounds

Responding to play and modernization:

- Technology and play — and how to marry the two
- Learn how to plan playgrounds from small settings catering for a local neighborhood to large, regional-scale playgrounds

Responding to the challenges of Compliance issues, including:

- Learn how to anticipate and manage playground noise levels, understand noise criterion, and the procedure for noise assessment
- Head Entrapments
- Tripping Hazards
- Pinch, Crush, Shear Points
- Stability
- General Cables/Wires
- Accessibility
- Electrical Hazards

KEY SPEAKERS

Jeanette Fich Jespersen — International Manager of the KOMPAN Play Institute

Jeanette is exceedingly equipped with the latest technical, innovative and insightful research results of playground design and implementation from a global stand-point. She will present the latest in research of play and play areas — key findings that will directly affect the success of your projects.

Clive Dodd — Director of Consulting Coordination and Risk Management Specialist

Remove all the risk from your work. With over 30 years industry expertise, Clive will train you in everything you need to know in compliance issues and risk assessment.

Who should attend?

ANYONE in the designing and planning of community spaces including parks and recreation spaces in the public arena. These include:

- Landscape Architects — AILA members Continued Professional Development
- Metropolitan and regional Parks and Leisure management staff
- Property Developers and marketers

Why should you attend?

The format of the Day-of-Play is structured so that you will be in a seminar room learning about the latest research and then experience an interactive and hands on session to further your professional development. A tour bus will take you to visit some of the most exciting and innovative playground designs that the city has to offer.

The Day-of-Play will equip you to make informed decisions and help you deliver on the strategic objectives that you face in every project. The Day-Of-Play Seminar Series will mature your existing knowledge of the playground industry and its challenges.

Day-Of-Play inclusions:

- Free to attend
- Transport is supplied
- Lunch is provided
- Presentation and training notes provided
