

THE UNIVERSITY OF
WESTERN AUSTRALIA
Achieving International Excellence

Please join us for the next AILA show for 2010 to hear Mary Warinner from Ecoscape and Dr Kathy Meney from Syrinx Environmental speak, followed by a BBQ and a drink or two... all are welcome.

'Designed Ecologies: a forum on emerging ideas and practice'

Ecoscape

Ecoscape is at the forefront of creating sustainable solutions using scientific rigor and creative design. Over the past 20 years Ecoscape has established an award winning reputation by successfully integrating its core disciplines of environmental science, landscape architecture and spatial planning. As a values driven organisation Ecoscape consider the relationship between between people, the environment and the economy and how this contributes to a better global future.

Syrinx Environmental

Kathy is Director and Science Principal of Syrinx Environmental PL (Syrinx). Kathy's visionary and practical approach to problem solving and design has set the benchmark for ecological restoration and sustainability in Australia. Syrinx is a unique multidisciplinary environmental and design company with expertise in conceiving and implementing innovative sustainable solutions that produce varied end-use scenarios - from habitat restoration to urban development.
